Average relative masses are 2001 values, rounded to two decimal places.

All average masses are to be treated as measured quantities, and subject to significant figure rules. Do not round them further when performing calculations.

Element name → Mercury

Atomic # → 80

Symbol → **Hg**

Avg. Mass → 200.59

Electronegativity → 1.9

Average relative masses are 2001 values, rounded to two decimal places.
